Key Insights

Institutional Investors

Institutional Investors from the US, the UK, the Netherlands, Sweden, Switzerland, Australia, Singapore, and Japan

Comparing Economic Outlooks

Institutional investors have a more optimistic outlook toward their own country’s economy than they do toward US and global economies, except in Switzerland.

- Institutional investors in the Netherlands, Singapore, and Switzerland are more optimistic about their country’s economic outlook than institutional investors from other countries.
- Except in Switzerland, institutional investors’ optimism about the global economic outlook is more in line with their optimism about the US’ economic outlook than their country’s economic outlook.

Surveyed Institutional Investors’ Outlook on Country, US, and Global Economies

Questions asked:

How do you feel about your country’s economic outlook in the next 12 months? (5-point scale: 1 “Pessimistic” to 5 “Optimistic”); Top 2 Box Reported; Base: Total.

How do you feel about the United States’ economic outlook in the next 12 months? (5-point scale: 1 “Pessimistic” to 5 “Optimistic”); Top 2 Box Reported; Base: Total.

How do you feel about the global economic outlook in the next 12 months? (5-point scale: 1 “Pessimistic” to 5 “Optimistic”); Top 2 Box Reported; Base: Total.

Predictions for the S&P 500

Nearly half of institutional investors are bullish about the S&P 500[®]. 49% of institutional investors are bullish about the S&P 500 returns in 2024, 39% are neutral, and 11% are bearish. On average, institutional investors who are bullish think that it will be up 19%, while those who are bearish think it will be down 17%.

Surveyed Institutional Investors' S&P 500 Predictions

The US and the Netherlands skew bullish (both 57%).
 Singapore skews neutral (58%).
 Australia skews bearish (22%).

Bullish Investors Predict the S&P 500 Will Be Up 19%, On Average

Bearish Investors Predict the S&P 500 Will Be Down 17%, On Average

Questions asked: By the end of 2024, do you think the S&P 500 returns will be up (bullish), flat (neutral) or down (bearish)? Base: Total.
 Approximately what percent do you think it will be up/down? Base: Those bullish/bearish.

Predictions for the S&P 500 by Country

Globally, institutional investors are split on the S&P 500[®] returns at the end of 2024. Nearly half are optimistic that it will be up. Most others believe it will be flat, while 11% globally expect a bear market.

- The US and Australia are the most polarized with some of the strongest views that the market will be up (57% and 50%, respectively), yet these countries also have the largest group of pessimistic institutional investors (20% and 22%, respectively).
- The Netherlands continues to be the most optimistic with the highest share of institutional investors predicting a bull market and the lowest share of those predicting a bear market.

Surveyed Institutional Investors' S&P 500 Predictions: A Breakdown by Country

Question asked: By the end of 2024, do you think the S&P 500 returns will be up (bullish), flat (neutral) or down (bearish)?

The S&P 500

Good Market Proxy and Portfolio Benchmark?

Institutional investors' perception of the S&P 500® and their use of it as a benchmark are in line. 41% of institutional investors believe the S&P 500 accurately reflects the US economy, while 53% feel it somewhat does but has its limitations. Similarly, 47% of institutional investors use the S&P 500 as a benchmark for most investments, while 51% only do so for some investments.

“Is the S&P 500 a Good Proxy for the US Economy?”

The UK less likely to say yes (27%) and more likely to say somewhat (69%).

“Does Your Institution Use the S&P 500 as a Benchmark for Any of Its Investments?”

UK less likely to say most (29%) and more likely to say some (66%).
Switzerland more likely to say most (67%) and less likely to say some (33%).

Questions asked:

Do you think the S&P 500 is a good proxy for the United States' economy? Base: Total.

Does your institution use the S&P 500 as a benchmark for any of its investments? Base: Total.

ETF Usage Among Institutions

A majority of institutional investors use ETFs in their investment strategy “frequently” or “extensively.” Among institutional investors, ETF usage is highest in Japan, followed by Australia and the Netherlands.

The Frequency at Which Institutional Investors Use ETFs as Part of the Firm’s Investment Strategy

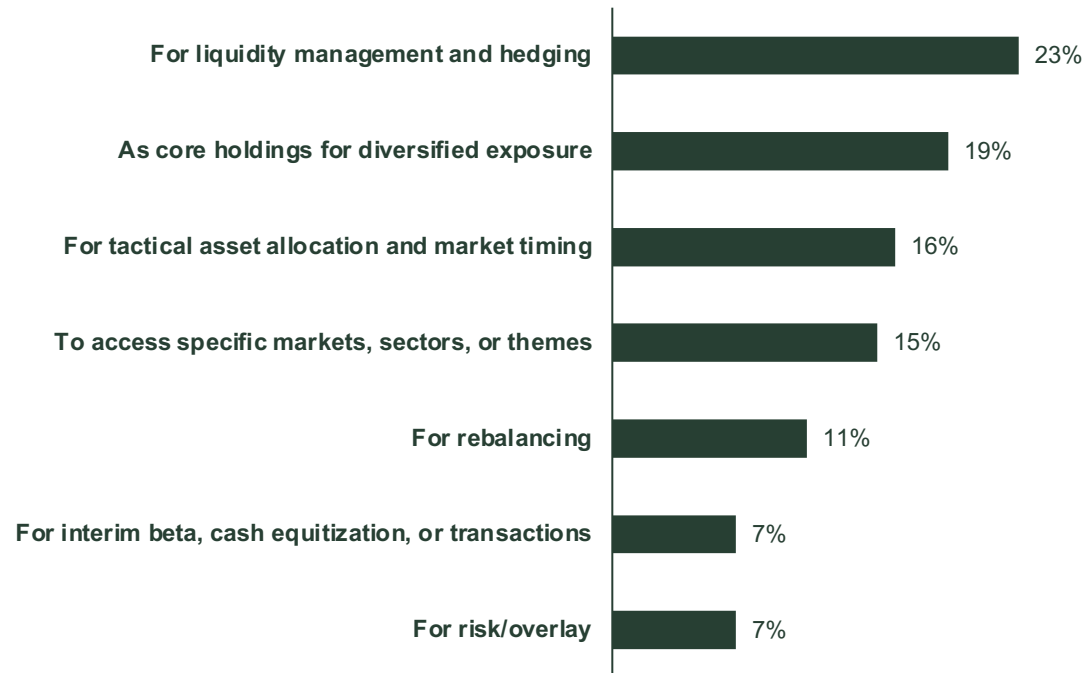

* Survey findings indicate heavy users as those who use ETFs “extensively” or “frequently.”
Question asked: Does your institution utilize ETFs in its investment strategy? Base: Total.

What's the Top Reason Institutions Use ETFs?

The greatest proportion of institutional investors selected liquidity management and hedging as their primary reason for using ETFs.

The Primary Reason Surveyed Institutional Investors Use ETFs

US more likely to use to access specific markets (24%).
UK more likely to use for liquidity management (33%).
Switzerland more like to use for tactical asset allocation (25%) and interim beta (14%).

Question asked: How does your institution **primarily** use ETFs within its investment strategy? (Please select one) Base: Those who utilize ETFs.

Decision Criteria for Institutions That Use ETFs

The criteria institutions use to decide between ETFs that offer the same or similar exposure varies by country:

- The US, UK, Sweden, and Singapore rank highest liquidity as the most important criterion.
- The Netherlands rank best track record/performance and lowest total cost as top factors.
- Switzerland and Japan rank lowest total cost as most important.
- Australia ranks most reputable issuer and investment philosophy as top criteria.

Decision Criteria When Choosing Between ETFs	Total (%)	US (%)	UK (%)	Netherlands (%)	Sweden (%)	Switzerland (%)	Australia (%)	Singapore (%)	Japan (%)
Highest liquidity	59	66	65	44	65	49	57	60	61
Best track record/performance	55	62	55	59	52	59	41	46	63
Lowest total cost	54	53	45	59	45	76	45	56	65
Most reputable issuer	50	43	57	51	49	39	59	56	43
Investment philosophy	46	46	41	54	51	41	59	40	31
Lowest tracking error	36	30	37	34	37	35	39	42	37

 Most Important

Question asked: When making a choice between ETFs that offer the same or similar exposure, please rank the following factors in order of importance to which ETF is chosen. Base: Those who utilize ETFs.

How Institutions Are Planning to Adjust Allocations in Next 12 Months

Globally, institutions lean towards keeping allocations the same in bonds and cash; they're split on whether to increase or keep allocations the same for equities and alternative investments. Cash allocations have the greatest likelihood to decrease in the next 12 months.

Planned Allocations in the Next 12 Months

Question asked: Think about how your institution is planning to allocate its investment portfolio in the next 12 months. For each of the following, please indicate whether your institution is planning to decrease, stay the same, or increase the allocation.

Likelihood to Consider Actively Managed ETFs

Among institutional investors who use ETFs, the vast majority are likely to consider actively managed ETFs. 80% of institutional investors are likely to consider actively managed ETFs, while only 4% are not likely.

Institutions' Likelihood to Consider Actively Managed ETFs

Netherlands more likely (90%)

Question asked: How likely is your institution to consider actively managed ETFs? (5-point scale: 1 "Not at all Likely to Consider" to 5 "Extremely Likely to Consider"); Base: Those who utilize ETFs. Top 2 Box Reported for Likely; Bottom 2 Box Reported for Not Likely.

Reasons for Using ETFs

Heavy versus Light ETF Users

Heavy ETF users cite more reasons for using ETFs than light users do. On average, the mean number of reasons for using ETFs is higher among heavy ETF users* than light ETF users^ (3.1 versus 2.5 reasons, respectively).

Why Institutional Investors Use ETFs	Heavy	Light
Cost efficiency (%)	60	51
Diversification benefits (%)	56	50
Cash/liquidity management (%)	50	38
Access a specific asset class or investment exposure (%)	49	38
Trading convenience (%)	49	36
Tax benefits (%)	48	36
Mean Number of Reasons	3.1	2.5

* Survey findings identify heavy users as those who use ETFs “extensively” or “frequently.”

^ Survey findings identify light users as those who use ETFs “sometimes” or “rarely.”

Question asked: Why does your institution use ETFs?

The Importance of Liquidity Heavy versus Light ETF Users

Significantly more heavy ETF users* than light ETF users^ say liquidity is important to their institution's investment strategy.

The Importance of Liquidity Among Institutional Investors Who Use ETFs

* Survey findings identify heavy users as those who use ETFs "extensively" or "frequently."

^ Survey findings identify light users as those who use ETFs "sometimes" or rarely."

Question asked: How important is liquidity in your institution's investment strategy? (5-point scale: 1 "Not at all Important" to 5 "Extremely Important"); Top 2 Box Reported for Important; Bottom 2 Box Reported for Not Important.

Comparing Portfolio Satisfaction Heavy versus Light ETF Users

Significantly more heavy ETF users* than light ETF users^ indicate that their institution is satisfied with the performance of its portfolio over the last 12 months.

Portfolio Satisfaction Among Institutional Investors Who Use ETFs Over the Last 12 Months

* Survey findings identify heavy users as those who use ETFs “extensively” or “frequently.”

^ Survey findings identify light users as those who use ETFs “sometimes” or “rarely.”

Question asked: How satisfied is your institution with the performance of its portfolio over the last 12 months? Top 2 Box Reported for Satisfied; Bottom 2 Box Reported for Not Satisfied.

Investment Management Challenges

There isn't much consensus on which challenges are most significant. But challenges like managing risks effectively, dealing with market volatility, and cybersecurity threats tend to top the list. Other top concerns across countries:

- Netherlands: Political instability and ESG issues
- Singapore: Achieving target concerns
- Switzerland: ESG issues
- Japan: Political instability and demographic shifts/aging population

Investment Management Challenges	Total (%)	US (%)	UK (%)	Netherlands (%)	Sweden (%)	Switzerland (%)	Australia (%)	Singapore (%)	Japan (%)
Managing risks effectively	30	32	30	28	36	22	32	38	20
Dealing with market volatility	28	32	30	21	20	25	44	22	30
Cybersecurity threats	28	30	39	20	32	24	32	26	10
Achieving target returns	25	31	33	14	19	20	16	36	28
Political instability/trade sanctions	23	19	23	27	24	20	32	14	30

 Most Significant Challenge(s)

Question asked: What are the three most significant challenges your institution faces in investment management?

Key Insights

Individual Investors

Individual Investors from the US, Australia, Singapore, and Japan

A Look at Investors' Personal Financial Outlook

Investors are generally more optimistic in April 2024 than in Q4 2022, except in Japan. In the US, Australia, and Singapore, investor optimism for their personal financial outlook has increased since Q4 2022 — roughly eight-in-ten are optimistic. In Japan, however, that number has decreased to seven-in-ten.

Surveyed Investors Who Are Optimistic* About Their Personal Financial Outlook

Question asked: What is your outlook for your financial future over the next 12 months? (11-point scale: -5 "Very Pessimistic" to 5 "Very Optimistic"); *Top 5 Box Reported; Base: Total.

Comparing Economic Outlooks

The further investors get from their own personal outlook on their financial future, the less optimistic they appear, **except in Japan**. There, investors express more optimism about the global economy than about their country's economy.

Percentage of Surveyed Investors Optimistic About Personal Finances, as well as Country, US, and Global Economies

Questions asked:

What is your outlook for your financial future over the next 12 months? (11-point scale: -5 "Very Pessimistic" to 5 "Very Optimistic"); Top 5 Box Reported; Base: Total.

How do you feel about your country's economic outlook in the next 12 months? (5-point scale: 1 "Pessimistic" to 5 "Optimistic"); Top 2 Box Reported; Base: Total.

How do you feel about the United States' economic outlook in the next 12 months? (5-point scale: 1 "Pessimistic" to 5 "Optimistic"); Top 2 Box Reported; Base: Total.

How do you feel about the global economic outlook in the next 12 months? (5-point scale: 1 "Pessimistic" to 5 "Optimistic"); Top 2 Box Reported; Base: Total.

Investors' Outlook on Their Country's Economy

A Generational Comparison

Across countries, boomers tend to be less optimistic about their country's economy compared to younger generations. However, nuances exist across countries:

- In the US, millennials are more optimistic than older generations.
- In Australia, Gen X is the least optimistic.
- In Singapore, millennials and Gen X are significantly more optimistic than boomers.
- In Japan, there are no significant differences across generations.

A Generational Breakdown of Surveyed Investors Optimistic About Their Country's Economic Outlook

Question asked: How do you feel about your country's economic outlook in the next 12 months? (5-point scale: 1 "Pessimistic" to 5 "Optimistic"); Top 2 Box Reported; Base: Total.

Investors' Outlook on the Global Economy

A Generational Comparison

Across countries, optimism about the global economy declines with age. Boomer investors in the US are particularly negative — only 8% have a favorable view.

A Generational Breakdown of Surveyed Investors Optimistic About the Global Economic Outlook

Question asked: How do you feel about the global economic outlook in the next 12 months? (5-point scale: 1 "Pessimistic" to 5 "Optimistic"); Top 2 Box Reported; Base: Total.

Predictions for the S&P 500

Overall, investors are more positive about S&P 500[®] returns for 2024 than they were for 2023. Investors in the US and Singapore are significantly more likely to be bullish about the S&P 500 than they were in Q4 2022, while investors in Australia and Japan are significantly less likely to be bearish and significantly more likely to be neutral.

Surveyed Investors' Predictions for the S&P 500 by the End of 2024

Question asked: By the end of [Nov/Dec 2022=2023 / Apr 2024=2024], do you think the S&P 500 returns will be up (bullish), flat (neutral) or down (bearish)? Base: Total.

ETF Awareness is Universally High

ETF awareness remains high across the US, Australia, and Singapore. In Japan, awareness has skyrocketed in under two years and is now on par with awareness percentages in the other countries surveyed.

Percentage of Surveyed Investors Aware of ETFs

Question asked: Please indicate whether or not your current investment portfolio contains each of the following? Inverse of “Never Heard of this Type of Investment” reported; Base: Total.

Individual Investors' Level of Concern

A Comparison by Country

- Singapore investors show the highest level of concern across all key economic drivers, except for election outcomes.
- US investors are most concerned about election outcomes. Given this is an election year in a highly polarized political environment, heightened concern among US investors is not surprising.
- Japan tends to be less concerned about these issues compared to the other countries.

Investors' Level of Concern Regarding Key Economic Drivers: A Breakdown by Country

Question asked: How concerned are you about each of the following? (5-point scale: 1 "Not at all Concerned" to 5 "Extremely Concerned")

ETF Usage Among Individual Investors Has Increased

ETFs are more popular among investors in April 2024 than in Q4 2022. In the US, Singapore, and Japan, more investors have ETFs in their portfolios in April 2024 than in Q4 2022; in Australia, significantly more do. Among the countries surveyed, investors in Singapore remain the highest users of ETFs.

The Percentage of Surveyed Investors Who Use ETFs in Their Portfolios

Question asked: Please indicate whether or not your current investment portfolio contains each of the following? "Yes, in my current investment portfolio" reported; Base: Total.

ETF Usage Across Generations

Millennials Use ETFs the Most

Millennials are more likely to invest in ETFs than other generational segments. Millennial investors in the US, Australia, and Singapore use ETFs the most and Boomers, the least.

The Percentage of Investors Who Use ETFs in Their Portfolios: A Generational Breakdown

Question asked: Please indicate whether or not your current investment portfolio contains each of the following?

Why Investors Choose ETFs

Top Three Reasons

ETFs deliver diversification and access at a lower cost. Across all four countries surveyed, investors using ETFs are doing so most often for their diversification benefits, flexibility in trading, and low cost/expense ratio.

The Top Reasons Surveyed Investors Choose ETFs for Their Portfolios

Question asked: Why do you have ETFs in your current investment portfolio? Base: Have ETFs in Current Investment Portfolio.

Why Investors Choose ETFs

Full List

A List of Reasons Surveyed Investors Choose ETFs for Their Portfolios

Question asked: Why do you have ETFs in your current investment portfolio?

ETFs Positively Impact Investor's Portfolios

A majority of investors agree that ETFs have improved the performance of their portfolios, more so in Singapore than in the other countries. Among Japanese investors, while still a majority, fewer agree with this statement in 2024 than in Q4 2022.

Percentage of Surveyed Investors Who Agree “ETFs have improved the overall performance of my portfolio”

Question asked: How much do you agree or disagree with each of the following statements about ETFs? (5-point scale: 1 “Disagree Completely” to 5 “Agree Completely”); Top 2 Box reported
Base: Have ETFs in Current Investment Portfolio; Caution: Australia Nov/Dec 2022 base size under n=20.

ETFs Positively Impact Investor Confidence

A majority of investors also agree that ETFs have made them a better investor, more so in Australia and Singapore than in the US and Japan.

Percentage of Surveyed Investors Who Agree “ETFs have made me a better investor”

Question asked: How much do you agree or disagree with each of the following statements about ETFs? (5-point scale: 1 “Disagree Completely” to 5 “Agree Completely”); Top 2 Box reported
Base: Have ETFs in Current Investment Portfolio; Caution: Australia Nov/Dec 2022 base size under n=20.

ETF Investors Are More Satisfied with Their Portfolio Performance

Across all four countries surveyed, investors who have ETFs are slightly or significantly more likely to be satisfied with their investment portfolio than investors who do not have ETFs.

The Percentage of Investors Satisfied With Their Investment Portfolio Performance Based on ETF Ownership

Question asked: How satisfied are you with your investment portfolio's performance over the last 12 months? (5-point scale: 1 "Not at all Satisfied" to 5 "Extremely Satisfied"); Top 2 Box Reported; Base: Have ETFs versus Do NOT Have ETFs.

ETF Comprehension Based on ETF Ownership

Except in Japan, most investors surveyed who do not have ETFs think various aspects of ETFs — like their tax efficiency, pricing, tradability, and more — are difficult to understand. **This suggests a need for more or better ETF education among those who do not have ETFs in their current investment portfolios.**

Percentage of Investors Who Think the Following Topics Are “Difficult to Understand” Based on ETF Ownership

Question asked: For each aspect of ETFs, please indicate whether you think it is easy to understand or difficult to understand. “Difficult to understand” reported; Note: “Easy to understand” is the inverse of “Difficult”; Base: Have ETFs versus Do Not Have ETFs.

Key Insights

US Financial Advisors

Advisors' Outlook on the US and Global Economies

Financial advisors are more optimistic about the US and global economies than individual investors. 77% of advisors are optimistic about the country's economic outlook, and 68% are optimistic about the global economic outlook. This is significantly higher than advised investors (35% and 28%, respectively).

Percentage of Advisors Optimistic About the US Economy

Percentage of Advisors Optimistic About the Global Economy

Questions asked:

How do you feel about your country's economic outlook in the next 12 months? (5-point scale: 1 "Pessimistic" to 5 "Optimistic"); Top 2 Box Reported; Base: Total.
 How do you feel about the global economic outlook in the next 12 months? (5-point scale: 1 "Pessimistic" to 5 "Optimistic"); Top 2 Box Reported; Base: Total.

Financial Concerns of Advisors Versus Investors

Financial advisors may be out of sync with their clients' top financial concerns, except when it comes to inflation. Advisors underestimate their clients' level of concern about election outcomes (in the 2024 election) and geopolitical instability — and overestimate their clients' level of concern with interest rate fluctuations and recession risks.

Advisors' Level of Concern About Key Economic Drivers Versus That of Advised Investors

Questions asked:

How concerned do you think your clients are about each of the following? (5-point scale: 1 "Not at all Concerned" to 5 "Extremely Concerned"); Base: Total; Top 2 Box Reported.

How concerned are you about each of the following? (5-point scale: 1 "Not at all Concerned" to 5 "Extremely Concerned"); Base: Total; Top 2 Box Reported.

The Impact of Financial Concerns on Allocation Strategies

All financial concerns are having at least a slight influence on the investment allocation strategies that advisors are recommending. Inflation, followed by fluctuation in interest rates and risk of recession, are most likely to very much affect the investment allocation strategies that advisors are recommending.

Interestingly, advised investors' top concern is election outcomes, yet this concern is one of the least likely to impact advisors' recommendations.

The Impact of Financial Concerns on Investment Allocation Strategies

Question asked: How, if at all, are each of your clients' concerns affecting the investment allocation strategies that you are recommending? Base: Those with concern.

Predictions for the S&P 500

Financial advisors are feeling positive about S&P 500® returns in 2024. More than 50% of advisors are bullish about the S&P 500's returns in 2024; only 5% are bearish. On average, financial advisors who are bullish think the S&P 500 will be up 15% by December 2024.

Surveyed Advisors' S&P 500 Predictions

Bullish Advisors Predict the S&P 500 Will Be Up 15%, On Average

Questions asked:
 By the end of 2024, do you think the S&P 500 returns will be up (bullish), flat (neutral) or down (bearish)? Base: Total.
 Approximately what percent do you think it will be up? Base: Those bullish.

The S&P 500

Good Market Proxy and Portfolio Benchmark?

Financial advisors' perception of the S&P 500[®] and their use of it as a benchmark are in line. 40% of advisors believe the S&P 500 accurately reflects the US economy, while 54% feel it does somewhat but has its limitations. With that in mind, 45% of advisors use the S&P 500 as a benchmark for most of their clients' investments, while 53% only do so for some of their clients' investments.

“Is the S&P 500 a Good Proxy for the US Economy?”

“Do You Use the S&P 500 as a Benchmark for Clients' Investments?”

Questions asked:

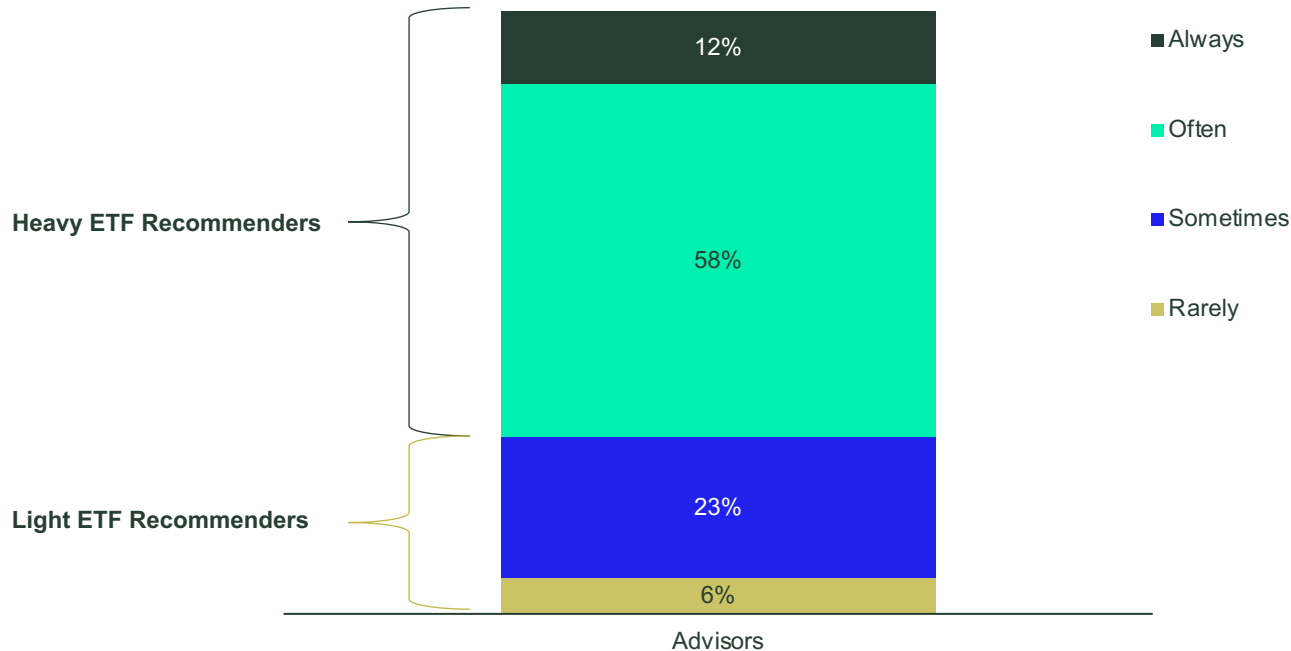

Do you think the S&P 500 is a good proxy for the United States' economy? Base: Total.

Do you use the S&P 500 as a benchmark for any of your clients' investments? Base: Total.

Likelihood to Recommend ETFs to Clients

Nearly all financial advisors recommend ETFs to their clients at least some of the time. 70% of financial advisors are heavy recommenders* of ETFs and 30% are light recommenders.^

The Frequency at Which Surveyed Advisors Recommend ETFs

* Survey findings identify heavy recommenders as those who offer ETFs “always” and “often.”

^ Survey findings identify light recommenders as those who offer ETFs “sometimes” or “rarely.”

Question asked: How often do you recommend ETFs to your clients? Base: Total.

Advisors Recommend ETFs for a Variety of Reasons

Advisors who recommend ETFs to their clients do so for a variety of reasons that likely reflect the investment vehicle's unique structure, including cost, trading flexibility, and diversification.

Advisors Recommend ETFs for a Variety of Reasons

Question asked: Why do you recommend ETFs to your clients? (Please select all that apply) Base: Those who recommend ETFs.

Decision Criteria for Advisors Who Recommend ETFs

When making a choice between ETFs that have the same or similar exposure, advisors say best track record/performance is the most important decision criterion. And 50% of advisors rank lowest expense ratio, highest liquidity, and most reputable issuer in the top three.

Factors and Criteria Most Important for Advisors Recommending ETFs

Question asked: When making a choice between ETFs that offer the same or similar exposure, please rank the following factors in order of importance to which ETF is chosen. Base: Those who recommend ETFs.

Attitudinal and Behavioral Differences

Heavy versus Light ETF Recommenders

Heavy ETF recommenders* are more attuned to market fluctuations and recession risks, place importance on liquidity, and favor equity and bond exposure. They are also more likely than light recommenders^:

- To be concerned with interest rate fluctuations and the risk of recession — and feel that liquidity is important to the investment strategies they’re recommending.
- To be advising clients to increase equity and bond exposure.
- To use the S&P 500® as a benchmark for most of their clients’ investments.

Concerned About:	Heavy	Light
Fluctuation in interest rates	72%	51%
Risk of recession	71%	49%

Importance of Liquidity	Heavy	Light
Important or Very Important	92%	69%

* Survey findings identify heavy recommenders as those who offer ETFs “always” and “often.”

^ Survey findings identify light recommenders as those who offer ETFs “sometimes” or “rarely.”

Advising Clients to “Increase” in Portfolio Allocation	Heavy	Light
Equity exposure	48%	27%
Bond exposure	43%	27%

Use S&P 500 as Benchmark for Clients’ Investments	Heavy	Light
Yes, for most	52%	29%

Heavy ETF Recommenders* Report Higher Client Satisfaction

While both are quite high, significantly more heavy ETF recommenders think their clients are satisfied with their portfolio performance than light ETF recommenders^ do.

Percentage of Advisors Who Think Their Clients Are Satisfied with Portfolio Performance

* Survey findings identify heavy recommenders as those who offer ETFs “always” and “often.”

^ Survey findings identify light recommenders as those who offer ETFs “sometimes” or “rarely.”

Question asked: In general, how satisfied do you think your clients are with their portfolio performance over the last 12 months? (5-point scale: 1 “Not at all Satisfied” to 5 “Extremely Satisfied”); Top 2 Box Reported.

The State of ETFs in the US

Comparing Responses Across US Individual Investors, Financial Advisors, and Institutional Investors

ETFs Are Popular Among Advisors and Institutions

While less than half (45%) of individual investors have ETFs in their investment portfolios, nearly 70% of advisors recommend ETFs to their clients always or often and 67% of institutional investors use ETFs in their investment strategies extensively or frequently.

*"Always" or "Often"

^"Extensively" or "Frequently"

Questions asked:
Please indicate whether or not your current investment portfolio contains each of the following?
How often do you recommend ETFs to your clients?
Does your institution utilize ETFs in its investment strategy?

ETFs Are Primarily Used for Cost and Diversification Benefits

In addition to cost efficiency and diversification benefits, both individual investors and financial advisors use ETFs for trading flexibility, while institutional advisors use ETFs for cash/liquidity management.

Top Three Reasons for Using or Recommending ETFs

Individual Investors		Financial Advisors		Institutional Investors	
Diversification benefits	49%	Cost efficiency	44%	Cost efficiency	57%
Flexibility in trading	47%	Diversification benefits	43%	Diversification benefits	54%
Lower cost/expense ratio	39%	Trading flexibility	43%	Cash/liquidity management*	46%

Questions asked:

Why do you recommend ETFs to your clients?

Why do you have ETFs in your current investment portfolio?

Why does your institution use ETFs?

*Only included in Institutional Investor survey

Performance, Cost, and Liquidity Are the Top Three Factors When Selecting ETFs

Advisors and institutional investors consider the following three factors to be most important when making a choice between ETFs that offer the same or similar exposure.

The Top Three Most Important Factors When Choosing Between ETFs With the Same or Similar Exposure*

Financial Advisors		Institutional Investors	
Best track record/performance	58%	Highest liquidity	66%
Lowest expense ratio	54%	Best track record/performance	62%
Highest liquidity	54%	Lowest total cost	53%

* Not asked among individual investors

Question asked: When making a choice between ETFs that offer the same or similar exposure, please rank the following factors in order of importance to which ETF is chosen.

All Investors Are More Likely to Be Bullish About S&P 500 Returns

Among the three groups surveyed, financial advisors and institutional investors are more bullish about 2024 S&P 500[®] returns than individual investors. However, institutional investors have the greatest proportion of those who predict a bear market.

Predictions for the S&P 500

Question asked: By the end of 2024, do you think the S&P 500 returns will be up (bullish), flat (neutral) or down (bearish)?

Survey Methodology

and Sample

Survey Methodology

State Street Global Advisors, in partnership with field partners A2Bplanning and Prodege, conducted an online study in April 2024 among individual investors, financial advisors, and institutional investors to assess investor sentiments, investment portfolio trends, the impact of ETFs on portfolio construction, and more.

This survey further builds on research conducted with individual investors in November and December of 2022. For the 2024 ETF Impact Survey, State Street Global Advisors expanded the scope to include institutional investors from various countries, as well as US financial advisors.

Survey Sample

Data was collected between April 1-25, 2024 from the following:

Individual Investors:

- In the US, data was collected from a nationally representative sample of 1,000 adults 18+, and then filtered for analysis among 319 individual investors with investable assets (IA) of US\$250K or more.
- In Australia, Singapore, and Japan, data was collected from 260, 254, and 220 individual investors, respectively, with IA equivalent of US\$250K or more.

Financial Advisors:

- In the US, data was collected from 201 financial advisors with assets under management (AUM) of US\$25M or more. 90% of the financial professionals surveyed had an AUM of US\$50M or more.

Institutional Investors:

- Data was collected from institutional investors who are involved in the decision making for AUM of US\$1B or more from the US (100), the UK (100), Netherlands (100), Sweden (75), Switzerland (51), Australia (50), Singapore (50), and Japan (50).

ETFs trade like stocks, are subject to investment risk, fluctuate in market value and may trade at prices above or below the ETFs net asset value. Brokerage commissions and ETF expenses will reduce returns.

Frequent trading of ETFs could significantly increase commissions and other costs such that they may offset any savings from low fees or costs.

The S&P 500® Index is a product of S&P Dow Jones Indices LLC or its affiliates ("S&P DJI") and have been licensed for use by State Street Global Advisors. S&P®, SPDR®, S&P 500®, US 500 and the 500 are trademarks of Standard & Poor's Financial Services LLC ("S&P"); Dow Jones® is a registered trademark of Dow Jones Trademark Holdings LLC ("Dow Jones") and has been licensed for use by S&P Dow Jones Indices; and these trademarks have been licensed for use by S&P DJI and sublicensed for certain purposes by State Street Global Advisors. The fund is not sponsored, endorsed, sold or promoted by S&P DJI, Dow Jones, S&P, their respective affiliates, and none of such parties make any representation regarding the advisability of investing in such product(s) nor do they have any liability for any errors, omissions, or interruptions of these indices.

In general, ETFs can be expected to move up or down in value with the value of the applicable index. Although ETF shares may be bought and sold on the exchange through any brokerage account, ETF shares are not individually redeemable from the Fund. Investors may acquire ETFs and tender them for redemption through the Fund in Creation Unit Aggregations only. Please see the prospectus for more details.

Bonds generally present less short-term risk and volatility than stocks but contain interest rate risk (as interest rates rise, bond prices usually fall); issuer default risk; issuer credit risk; liquidity risk; and inflation risk. These effects are usually pronounced for longer-term securities. Any fixed income security sold or redeemed prior to maturity may be subject to a substantial gain or loss.

Distributor: State Street Global Advisors Funds Distributors, LLC, member FINRA, SIPC, an indirect wholly owned subsidiary of State Street Corporation. References to State Street may include State Street Corporation and its affiliates. Certain State Street affiliates provide services and receive fees from the SPDR ETFs.
