Past Performance is not a reliable indicator of future performance.

Performance returns for periods of less than one year are not annualised and have been calculated based on changes in the net asset value of the Fund rather than the last quoted price. Fund Performance is the Total Return, representing the sum of the Growth (or Price) Return and Distribution Return.

Performance is shown net of fees. Fund returns do not reflect the brokerage fees or the bid/ask spread that investors pay to buy and sell ETF securities on the Australian Securities Exchange. Investment return and principal value will fluctuate, so you may have a gain or loss when units are sold. Current performance may be higher or lower than that quoted. Performance figures shown are in Australian dollars. Index returns are unmanaged and do not reflect the deduction of any fees or expenses. The index returns reflect the changes in the total float-adjusted market capitalisation of the index's constituents.

invest by sampling an index, holding a range of securities that, in the aggregate, approximates the full index in terms of key risk factors and other characteristics. This may cause the fund to experience tracking errors relative to performance of the index.

Investing involves risk including the risk of loss of principal. Diversification does not ensure a profit or guarantee against loss.
